YOUR FUTURE IN INNOVATION

OUR PREMIUM SOLUTION!

THE WORLD IS CHANGING - INNOVATIONS APPEAR AND COOPERATIONS BETWEEN LEADING COMPANIES ARE RISING

The history of TZ Austria starts in 1987, when Erich Glaser founded the company „Tischlerei Glaser & Co“. The workshop in Spannberg, near Vienna, which was originally 800 m², had to be extended by a further 2.700 m² just six years after opening.

The large demand and the related business success allowed the continuous investment in research and machinery. Meanwhile, the company's workspace in Austria has grown to more than 10.000 m².

Today, TZ Austria is one of the highest quality and most reliable suppliers to the furniture and door industry in the world. The success is based on the constant optimization of the production processes in combination with well-educated employees, excellent quality of materials used and latest technology machinery.

Since 2009, TZ has also become active beyond Austria's borders and has branches in Asia, Australia, America and Europe.

TEAMWORK IS THE ABILITY TO WORK TOGETHER TOWARD A COMMON VISION. THE ABILITY TO DIRECT INDIVIDUAL ACCOMPLISHMENTS TOWARD ORGANIZATIONAL OBJECTIVES. IT IS THE FUEL THAT ALLOWS COMMON PEOPLE TO ATTAIN UNCOMMON RESULTS."

ANDREW CARNEGIE

The goal of TZ Austria is to develop an increasingly intuitive and efficient manufacturing system and to optimize work processes. A self-developed production software makes it possible to control the process of each individual part within the production.

We, as TZ Austria, are proud to announce our new partnership with CAD+T Software. It will give us the opportunity to offer a unique software and hardware package to our clients. CAD+T enables joineries and architects to design cabinets and show 3D models to their customer for better presentation. Machine data is automatically created and sent to production. The above mentioned package includes software, hardware and services starting from design through to invoice.

Benefit from almost 70 years of our common experience in interior design and furniture industry.

BENEFIT FROM:

- ✓ Automatical daily price update
- ✓ Daily sync of materials and decors
- ✓ High-End Software package with cloud ability
- ✓ 3D Visualization
- ✓ High-quality machinery made in Germany
- ✓ Extensive hardware libraries from leading companies
- ✓ Online shop with intuitive user interface

YOUR PROCESS WITH CAD+TZ!

BENEFIT FROM A COMPLETE AND HIGHLY EFFICIENT PROCESS, EXTENSIVE EXPERT KNOW HOW AND HIGH-END MACHINERY!

» **PROCESS REQUEST FROM TZ**
OR
» **CUSTOMER REQUIREMENTS**

» **DESIGN + ESTIMATION**

» **VISUALIZATION**

Quick and easy 3D-designs including walls, doors, windows and cabinet configurator. Fast adjustable calculation with different calculation schemes.

Create high-end renderings, 360° panoramas and videos. Live-sync to design module available.

PRODUCTION DATA >> PRODUCTION >> DELIVERY >> INVOICING

Prepare your production data individually for your machines. Either for in house production or contract manufacturing.

Ready to create stunning furniture with the delivered software and hardware.

Your order is fully processed! Prepare for assembly and delivery to your customer.

TZ provides invoices for the order to be sent to your client.

OUR SOLUTION INCLUDES:

CAD+T provides joineries a platform for design, calculation and visualization of their customer requirements. A daily updated material database including prices is automatically shown in the software, depending on the product range of the chosen production facility. Therefore no manual process is required for any update in the future.

Once the design is finalized in the software, the production data including CNC programs is automatically imported, analyzed and processed from TZ Austria. A chaotic production system enables waste optimized cutting and fast processing, sorted by delivery date. Due to a barcode system the actual status of each part can be checked at any time. As a service for our partner facilities, TZ Austria takes care of the billing after delivery of goods by the facility itself or shipping company.

The cooperation between CAD+T and TZ Austria offers you a unique production concept that automizes your complete workflow and enhances it by special materials.

Your future in innovation, our premium solution!

CORPUS

TZ Austria uses self-developed machines to produce unique edges in high quality. The various forming technologies enable a seamless blending between edge and surface to achieve a perfect look and feel without handles.

Our ready to use doors save time for joiners and minimize production errors. TZ handles fit into private rooms as well as in offices and showrooms.

Your dream furniture is within reach with the design and production concept from CAD+T and TZ.
